Kahoot: Agents and Automation, Explained

AI Administrator · Day 1 · Session 1 · 30 questions

Instructor answer key for the Kahoot import file

How to import

1. In Kahoot, choose **Create**, then **Import spreadsheet** (the 'Add question' menu offers 'Import spreadsheet').
2. Upload **Day1_S1_Kahoot.xlsx**. All 30 questions arrive as quiz questions with a 20-second timer.
3. Set the kahoot's cover title and run it in the room at the end of the session, or as a homework challenge.

Design notes

Written against the "longest answer is right" habit: on every question the four options are within a few characters of each other in length, the correct answer is spread evenly over positions A to D, and no option is "all of the above". Question text under 120 characters, answers under 75, as Kahoot requires.

Correct answers by position A, B, C, D: 7, 8, 6, 9.

Questions and answers

#	Question	A	B	C	D	Correct
1	Who decides the steps in an automation?	The model, while it runs	The designer, in advance	The person using it	The tool it calls	**B**
2	Who decides the steps in an agent?	The designer, in advance	The person using it	The model, while it runs	The spreadsheet	**C**
3	A form submission creates a sheet row and sends a confirmation email. This is…	An automation	An agent	A multi-agent	A chatbot	**A**

#	Question	A	B	C	D	Correct
4	‘Find out why this invoice was rejected and prepare a corrected version’ is a task for…	A fixed script	A daily report	A form	An agent	**D**
5	Which is NOT one of the four parts of an agent?	Memory	Tools	Dashboard	Instructions	**C**
6	Which part of an agent is the system prompt?	Instructions	Memory	Tools	The model	**A**
7	Which part lets an agent send an email or create a ticket?	Instructions	Memory	The model	Tools	**D**
8	Which part makes an assistant seem to know your organisation?	Tools	Memory	The model	The loop	**B**
9	What does a language model actually do?	Predicts the next word	Searches a database	Runs a fixed script	Copies a web page	**A**
10	In the agent loop, what happens in the ‘observe’ step?	It writes the goal	It asks a person	It reads the tool result	It picks a model	**C**
11	What is the correct order of the agent loop?	Act, think, observe	Think, act, observe	Observe, act, stop	Act, stop, think	**B**
12	The ReAct pattern means…	React to user mood	Reason, then act	Run a fixed script	Reply, then exit	**B**

#	Question	A	B	C	D	Correct
13	Why does an agent need an iteration limit?	To run much faster	To use more tools	Each loop costs money	Models tire quickly	**C**
14	‘Tool quality is answer quality’ means…	Buy only the costly tools	Use many tools at once	Tools must be coded first	Agents know only tool output	**D**
15	Most useful office systems are…	Fully autonomous agents	Workflows with AI steps	Manual checklists	Chatbots only	**B**
16	Sorting support emails into billing, technical and sales is best built as…	A workflow with AI step	A full autonomous agent	A scheduled report	A manual task	**A**
17	Compiling a weekly status report from five trackers is best built as…	A full agent task	A manual phone call	A workflow with AI step	A paper form	**C**
18	Researching three suppliers and preparing a comparison table is best built as…	An agent with tools	A simple automation	A scheduled email	A manual task	**A**
19	Approving a refund above the policy limit should be…	A full agent task	An automation	An AI step	Kept with a person	**D**
20	The rule of thumb for choosing a design is…	Most autonomy first	Least autonomy that works	Always use an agent	Never use a model	**B**
21	Automation reliably removes which kind of work?	Deciding and judging	Approving budgets	Copying and chasing	Hiring new staff	**C**

#	Question	A	B	C	D	Correct
22	Decisions about money, people or law should…	Go to the agent	Stay with a person	Be automated	Be skipped	**B**
23	The context window is…	The model's permanent disk	A tab in the web browser	The list of allowed tools	All the model sees right now	**D**
24	What fixes a bare model's habit of guessing numbers and live facts?	A longer prompt	A faster model	A friendly tone	Giving it tools	**D**
25	What fixes a bare model forgetting yesterday's conversation?	Adding memory	A bigger screen	More tools	A new vendor	**A**
26	How does a model ask for a tool?	It runs the code by itself	It emails the administrator	It cannot ask for anything	It writes a structured request	**D**
27	Where can a human sit in the agent loop?	Only at the very start	Only at the very end	Nowhere in the loop at all	Before an action or at the end	**D**
28	An agent that is confused will typically…	Stop with an error	Keep going wrongly	Ask for a budget	Shut itself down	**B**
29	OpenClaw and Hermes are examples of…	Spreadsheet add-on tools	Email hosting providers	Project tracking boards	Always-on personal agents	**D**
30	What is the lab deliverable for this session?	A ten-row task inventory	A working n8n flow	A policy document	A slide deck	**A**
