Kahoot: Prompting for Operators

AI Administrator · Day 1 · Session 2 · 20 questions

Instructor answer key for the Kahoot import file

How to import

1. In Kahoot, choose **Create**, then **Import spreadsheet** (the ‘Add question’ menu offers ‘Import spreadsheet’).
2. Upload **Day1_S2_Kahoot.xlsx**. All 20 questions arrive as quiz questions with a 20-second timer.
3. Set the kahoot’s cover title and run it in the room at the end of the session, or as a homework challenge.

Design notes

Written against the “longest answer is right” habit: on every question the four options are within a few characters of each other in length, the correct answer is spread evenly over positions A to D, and no option is “all of the above”. Question text under 120 characters, answers under 75, as Kahoot requires.

Correct answers by position A, B, C, D: 5, 4, 6, 5.

Questions and answers

#	Question	A	B	C	D	Correct
1	A prompt is best thought of as…	A work instruction	A friendly chat	A search query	A password	**A**
2	Which of these is NOT one of the five parts of a working prompt?	Role	Context	Signature	Constraints	**C**

#	Question	A	B	C	D	Correct
3	A prompt gives a different shape of answer every run. Which part is probably missing?	Output format	Role	Greeting	Context	**A**
4	What is the standard a prompt must meet before it goes inside an automation?	It sounds polite	It is under 50 words	It is written in English	It repeats the same shape	**D**
5	Which line turns a confident wrong answer into a flag a person can act on?	Be very accurate	If unclear, say unclear	Answer quickly	Use bullet points	**B**
6	‘Category must be one of: billing, technical, sales, other’ is an example of…	A role statement	A few-shot example	Stating allowed values	A greeting	**C**
7	Few-shot prompting means…	Showing worked examples	Asking several times	Using very short prompts	Splitting across models	**A**
8	Why do examples work better than descriptions?	Models copy patterns well	Examples are shorter	Models ignore rules	Examples cost less	**A**
9	How many test inputs does the module ask you to collect for a classifier?	Three	Five	Ten	Fifty	**C**

#	Question	A	B	C	D	Correct
10	Two of ten test emails are mislabelled. The right fix is to…	Add ‘be more accurate’	Delete the two emails	Add a constraint or example	Use a longer prompt	**C**
11	After fixing a prompt, what do you re-run?	Only the failed rows	All ten rows	A brand new set	Nothing, it is fixed	**B**
12	Why keep the ten-row test set after the prompt works?	To prove the work	Models and prompts change	It has no further use	To train the model	**B**
13	ChatGPT Projects, Claude Projects, Gems and Copilot agents all let you…	Train your own model from scratch	Send emails on your behalf	Run n8n workflows for you	Save instructions with files	**D**
14	A department assistant built from a Project with documents has which agent parts?	Model, instructions, memory	Model and tools only	Tools and memory only	Instructions only	**A**
15	‘Data goes where the model goes’ is a warning about…	Slow internet connections	Prompts that are too long	Using two models at once	Uploading sensitive documents	**D**
16	Hallucination is when the model…	Refuses to answer	Answers too slowly	Produces a plausible fact	Repeats the question	**C**
17	Which is NOT one of the three habits that catch hallucination?	Ground it in a real source	Give it an exit to say no	Check the checkable facts	Ask it to rate its confidence	**D**

#	Question	A	B	C	D	Correct
18	‘Summarise this email and tell me what to do’ breaks which rule?	Always use a role line	Never mention email	Use a formal tone only	One verb, one deliverable	**D**
19	Which product and feature pair is correct?	Gems: Microsoft Copilot	Projects: Claude	Custom GPTs: Gemini	Notebooks: ChatGPT	**B**
20	In the lab, which documents may you upload to your assistant?	Your real HR files	Any internal contract	Public or made-up policies	Colleagues’ emails	**C**
